PROJECTS

Rohan's Television— [Live site](#) | [Client site code](#) | [Server Site Code](#)

Resale Product Based MERN Project

- Firebase Authentication with email password and Google account. Users have to be registered to be able to see the products under different categories. There are three types of users- Admin, Seller and Buyer. If the user registers using email and password he can select his role as seller or buyer. If the user joins with google pop up their role is set as buyer.
- Users Details are saved during registration in MongoDB database with node.js. For joining with google pop up, the user's email is searched in MongoDB. If the user is not found user data is added to the MongoDB database. If user data is found then the process of adding data to MongoDB is skipped.
- Users Details are saved during registration in MongoDB database with node.js. For joining with google pop up, the user's email is searched in MongoDB. If the user is not found user data is added to the MongoDB database. If user data is found then the process of adding data to MongoDB is skipped.

Tools: React, MongoDB, Node, Express, Firebase, Tailwind CSS, Daisy UI, Vercel, JWT.
